The B2B Outbound Playbook Is Dead. Here is what replaces it.

In 2026, spraying 10,000 generic cold emails a month burns your domain in 30 days and yields an embarrassing 0.8% reply rate.

Buyers don't want templates. They want **timed reactions**.

Here is why we built **Vance AI** (@usevance.ai).

Why the $4,500/mo Human SDR Model Is Collapsing

01 **Spray & Pray Deliverability Trap** — Burnt Domains

Email providers now aggressively penalize template blast volume. Real inbox rate drops to <65%.

02 **Astronomical Burn Rate** — $60k/yr Wasted

$4,000 to $6,000/mo base salary + 3 months ramp time for an average 1.2% qualified meeting rate.

03 **Zero Intent Signal Awareness** — 94% Ghost Rate

Reaching out blindly when the target account has zero budget, no open roles, and zero interest.

Meet Vance: Autonomous Intent SDR

23 Buying Triggers

Hiring surges, tech stack churn, funding rounds, and website reverse-IP tracking.

15-Min Cadence Engine

Captures buyer attention in real-time while their intent trigger is at its absolute peak.

Zero Boilerplate Pitching

Gemini 1.5 Flash crafts hyper-specific 50-word angles tied directly to the trigger.

99.2% Deliverability SLA

Isolated secondary warm domain network keeps your primary domain 100% safe.

Two Pillars: Live Signals + Micro-Pitching

🎯 PILLAR 1: LIVE INTENT AUDIT

Scans 23 signals 24/7 (hiring spikes on LinkedIn, Google SERP sweet spots, SDK headers).

`23 Live Signals`

⚡ PILLAR 2: BESPOKE DISPATCH

Generates 40-word problem-solver reaction pitches. Delivered via isolated domains with <2% bounce rate.

`Sub-2% Bounce SLA`

Zero Domain Decay:	Secondary domain network + waterfall verification = sub-2% bounce SLA.

DAY 01 INVITATION

We're Onboarding 10 Founding B2B Partners

To celebrate Day 1, we are offering complimentary intent audits for 10 high-growth B2B companies.

Tell us your ICP (Industry, Title, Tech Stack) — Vance will scan live streams and deliver **20 verified high-intent leads** straight to your inbox.
